BSE calculates each OTR for each trading day per Exchange Members and per individual instruments using the following formulas for each trading day, taking into account all trading periods of the trading day:

$$OTR_{no} = \frac{\text{Number of orders entered by Exchange Member}}{\text{Number of orders entered and executed by Exchange Member} + \text{minimum value of denominator}} - 1$$

$$OTR_{vol} = \frac{\text{The total value of orders entered by Exchange Member (volume)}}{\text{The total value of entered and executed orders by Exchange Member (volume) + minimum value of denominator}} - 1$$

In the denominator of OTR formulas contains all executed orders including partially executions and minimum value specified for the given instrument group is also added while in the numerator all orders are aggregated including entered, modified and deleted orders.

Orders that are deleted out of the Exchange Member's intention – e.g. deletion made by the Exchange, orders not accepted at auction, deletion due to lost connectivity or due to activation of Kill functionality - won't be taken into account while calculation OTR indicators.

When calculating the OTR_{vol} for different sections the transaction values (volumes) are determined as follows:

- Equities section, BETA market: volume
- Debt security section: nominal value
- Derivatives market, Commodity market: number of contracts

When calculation OTR formulas, type of orders and restrictions are taken into account with the following weighting factors:

Weights according to the type of order and restrictions	
Order type	Weight multiplier
Limit order enter/deletion	1
Limit order modification	2
Market order submission/deletion	1
Market order modification	2
Iceberg order submission/deletion	1
Iceberg order modification	2
Market-To-Limit order submission/deletion	1 (in case of activation 2)
Market-To-Limit order modification	2 (in case of activation 3)
Quote submission/deletion (Standard Market Maker Order, Indicative quote with volume, Matching quote, Price without turnover quote)	2
Quote modification (Standard Market Maker Order, Indicative quote with volume, Matching quote, Price without turnover quote)	4
Order restriction	Weight multiplier
Stop	1 (in case of activation 2)
Immediate-or-Cancel	1 (in case of withdrawal/deletion 2)
Fill-or-Kill	1
Book or Cancel	1
Strike Match Order	1

BSE measures OTR indicators for individual instruments on daily basis, and report those formulas to Exchange Members (only the relevant ones) on a monthly basis showing their daily performance and their possible limit exceeds.

If BSE determines that the OTR indicators calculated above exceeds at least one of the predefined maximum value in respect of one or more individual instrument for a given Exchange Member than the Exchange will warn the Exchange Member within 3 trading days and may apply sanctions in accordance with the authorization granted in Section 11 of Chapter 1 of Part II. of the Book Three of the General Terms of Service of the Budapest Stock Exchange Ltd. titled Regulations on Trading as follows:

- In case of first three daily limit exceeds in a given calendar year – regardless the number of instruments and type of OTR formula – BSE will warn the Exchange Member
- In case of every limit exceed following the first three exceeds in a calendar year - regardless the number of instruments and type of OTR formula – BSE will determine a fine of 100.000 HUF per day

The CEO of BSE continuously monitors the OTR indicators per Exchange Member and per individual instruments, and if justified by market conditions maximum OTR numbers will be modified.
