INVESTOR ANNOUNCEMENT

Waberer's listed parent company to operate as W Solum Holding

Budapest, October 29, 2026 – WABERER'S INTERNATIONAL Nyrt. (hereinafter: the "Company") hereby announces that, subject to approval by the General Meeting, it will continue its operations under the name **W Solum Holding Nyrt.** The change is intended to ensure that the name of the listed parent company more accurately reflects the Group's business portfolio, which has expanded significantly in recent years. While the Waberer's name is primarily associated with transport and logistics, insurance has become another core pillar of the Group through Gránit Insurance and the Hungarian Post Insurance Companies, and its real estate development business is also being gradually established. Following the announced name change, the holding company's umbrella brand will be the first to be refreshed, followed by a phased renewal of the operating brands.

For decades, the Waberer's name has been closely associated with road transport and logistics. While this brand recognition remains a significant asset, the Group's activities now extend well beyond what the name initially suggests. Over the past four to five years in particular, the portfolio has expanded substantially to include rail logistics, regional logistics capacity and road passenger transport. The Hungarian Post Insurance Companies, which joined the Group through Gránit Insurance at the end of 2024, significantly broadened the insurance business, making it another core pillar of the Group alongside logistics. The gradual development of the real estate development business is further broadening the portfolio. The listed parent company's current name is increasingly less representative of this more diversified business; changing the holding company's name is the next step in an evolution that has been under way for several years.
"Solum" is a Latin word meaning soil, ground or foundation. The new name conveys the solid foundation on which the Group's various businesses and future growth can be built. The initial "W" and "Sol" (sun), embedded in the name and evoking Waberer's well-known sun symbol, connect the new holding brand to the Waberer's heritage.

"The Waberer's name stands for decades of work, experience and trust, and we will continue to build on that legacy. At the same time, our Group has changed considerably. In addition to logistics, we have become a major player in the Hungarian insurance market by building a comprehensive portfolio of services covering both life and non-life insurance products, and we are also developing our real estate development business. We have reached a point where the name of our listed parent company needs to reflect more accurately the Group it represents. W Solum reflects this evolution while building on the Company's heritage of nearly 80 years," said Zsolt Barna, Chairman and CEO of Waberer's International Nyrt.

Portfolio expansion reflected in financial results

Beyond road transport, the Group's logistics operations include integrated warehousing and freight forwarding solutions, rail services and passenger transport. Through Gránit Insurance and the Hungarian Post Insurance Companies, its insurance business has its own established market presence and broad customer base. Gradually expanding real estate development could also contribute to future Group growth. The portfolio's transformation also shows in financial results: in 2025, Group revenue reached **EUR 816 million**, up 20% over three years, while EBITDA rose by over 40% to **EUR 119 million** and EBIT by nearly 60% to **EUR 58 million**. Significant service portfolio expansion also contributed to this growth.

"The transport industry has a tradition of brands bearing the names of their owners, and the Waberer's name reflects that heritage. Today, the Company is backed by financial investors, and the parent company is no longer directly involved in transport operations. The holding company's role is to support the development of the Group as a whole, align the strategic objectives of its various businesses and optimise the implementation of investments across the Group. This means both further developing our businesses that already hold strong market positions and building new avenues for growth. W Solum would reflect this Group-level role, while the individual companies would continue to operate in their respective markets under the brands familiar to their customers," said Barna Erdélyi, Member of the Board of Directors of Waberer's International Nyrt. and Chairman of the Boards of Directors of Gránit Insurance and the Hungarian Post Insurance Companies.

W Solum represents the value of the entire Group

The W Solum brand's tagline, "Build for more", expresses the Group's commitment to building on its existing strengths and pursuing further growth.
"Our shareholders own a group of companies whose value is determined not only by its logistics operations, but also by the performance, market position and growth prospects of its insurance, rail and passenger transport businesses, as well as those of its other subsidiaries. It is important that our name on the stock exchange reflects this entire portfolio and clearly communicates to investors the underlying business value of our shares. The W Solum holding brand fulfils this role by bringing together our well-established and strong brands in their respective markets under a single, unified group-level name on the capital markets." added Szabolcs Tóth, Member of the Board of Directors and Deputy CEO – Finance and Strategy of Waberer's International Nyrt.

The proposed name change will be submitted to the Company's General Meeting on December 8, 2026, for approval. Subject to approval and completion of the necessary corporate legal procedures, it is expected to take effect in early January 2027.
